7] ABSTRACT

The subject of the invention is new derivatives (I) and (II) of cyanuric acid which have the formula, respectively,

in which:

R' and R" are -CH2-CH(OH)-CH2OH and

R is an alkyl containing a polymerizable ethylenic functional group such as an acrylic, methacrylic or allyl group.

The derivatives (I) and (II) according to the invention may be employed as crosslinking agents in polymers.
